Mobile & E-Commerce	UI/UX & Web
Android/iOS business applications and customer-facing commerce experiences.	Responsive business portals and interfaces designed for clarity and usability.
E-Receipt / E-Invoice	Support & Optimization
Retail integration with Egyptian electronic receipt and invoicing processes.	Go-live support, issue resolution, performance and continuous improvement.

Microsoft Dynamics 365 Finance & Operations

إلى نقطة البيع - بدون فجوات بين الأنظمة ERP من الـ

We design and support end-to-end Dynamics 365 solutions that connect core ERP processes with retail operations, integrations and operational applications.

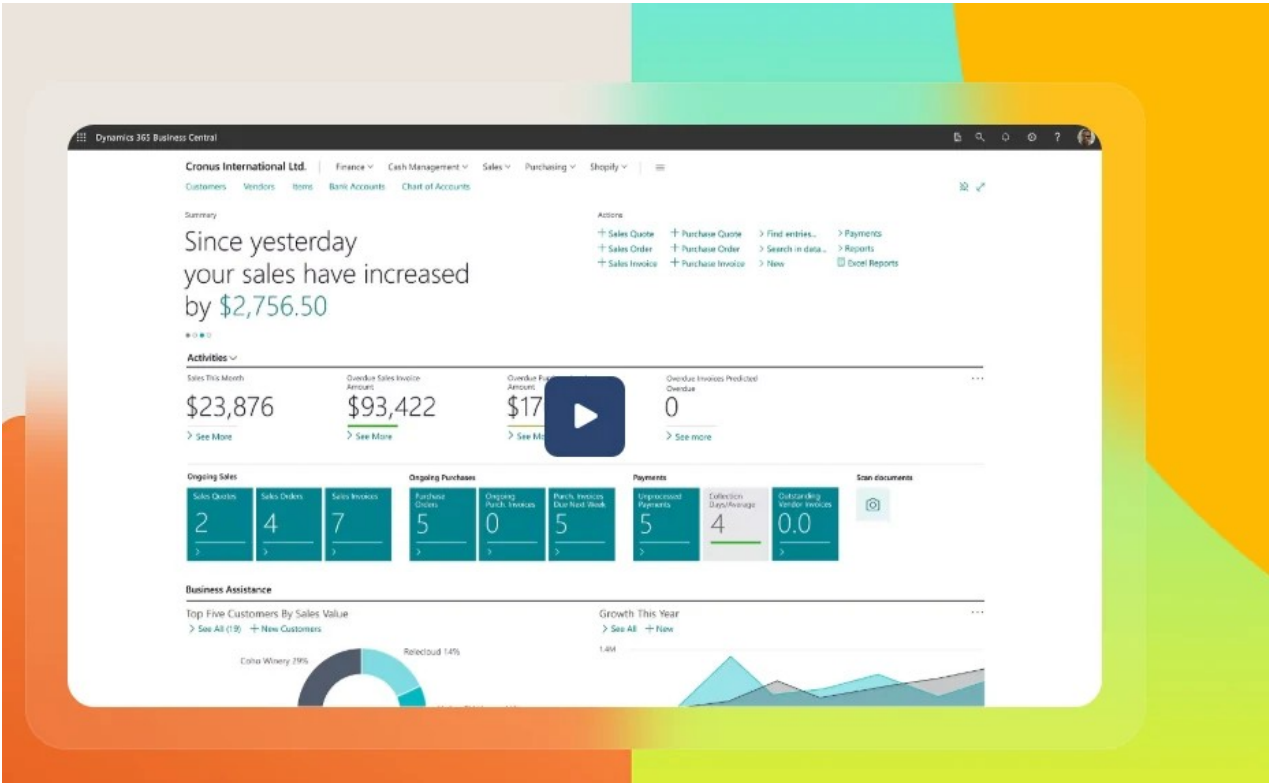

Finance & Operations Core finance and operational processes.	Supply Chain Procurement, inventory, products and supply processes.
Commerce / POS Retail and store-facing operations.	X++ Development Extensions and business logic where customization is required.
Data Migration Structured migration, validation and cutover support.	OData / APIs Integration with external systems and operational applications.
Security & Roles Role design, duties, privileges and access governance.	Support & Optimization Stabilization, troubleshooting and continuous improvement.

Implementation Approach

01 • Understand Map processes, pain points, systems and integrations.	02 • Design & Build Create a scalable solution with controlled customization.
03 • Integrate & Test End-to-end validation of data, processes and readiness.	04 • Go-Live & Support Structured launch, monitoring and continuous optimization.

Microsoft Dynamics 365 Business Central

ERP for growing businesses

Microsoft Dynamics 365 Business Central

Business Central brings finance, sales, purchasing, inventory, projects and operations into a connected ERP experience. Delta Retail Solution supports implementation, configuration, integrations, migration and operational adoption.

Financial Management General ledger, receivables, payables, cash and financial visibility.	Sales & Purchasing Connected customer and vendor processes.
Inventory & Supply Stock visibility, replenishment and operational control.	Integration Connect Business Central with mobile, e-commerce and external platforms.

Retail POS & Commerce

Technology built around store operations

Retail environments demand reliable, fast and integrated store technology.

Our retail solutions focus on the complete store journey - from product and price information to checkout, promotions, inventory, returns, integrations and management visibility.

Point of Sale Fast, reliable checkout and retail workflows.	Pricing & Promotions Pricing, offers and customer-facing price experiences.
Inventory Visibility Connect store activity with stock and ERP processes.	Store Integration APIs linking POS, ERP, mobile and external platforms.
Operational Apps Mobile tools for receiving, shelf labels, approvals and store tasks.	Reporting & Analytics Actionable visibility for retail operations and management.

Public communication highlighting companies that joined the pilot operation of Egypt's electronic receipt system.

Kayan Textiles - كيان لصناعة الملابس الجاهزة - appeared among the companies highlighted for joining the pilot operation of Egypt's electronic receipt system. Delta Retail Solution delivered the technical integration work for Kayan's retail environment.

This case reflects our ability to connect retail transaction flows with regulatory digital platforms while preserving operational continuity, data accuracy and store usability.

This portfolio describes the integration work performed for the client and does not represent a certification or endorsement of Delta Retail Solution by the Egyptian Tax Authority.

Selected Retail Environments

بيئات عملاء من قطاع التجزئة

Pompelo

Retail fashion / footwear environment

We understand that technology must work under real store conditions: fast customer service, accurate stock, stable integrations and simple operational workflows.

How We Work

منهج العمل

Discover Understand the business, users, current systems and measurable objectives.	Design Define architecture, user journeys, integrations and implementation boundaries.
Build Configure, develop and integrate with focus on maintainability and performance.	Validate Test business scenarios, data, security, integrations and user acceptance.
Go-Live Plan cutover, deployment, monitoring and operational handover.	Improve Support users, resolve issues and continuously optimize the solution.

Why Delta Retail Solution?

Retail Understanding Solutions shaped around real store and operational workflows.	ERP + Digital Connect enterprise processes with POS, mobile and e-commerce.
Integration Capability APIs, OData, data movement and cross-system process design.	Regional Context Experience supporting business needs across Egypt and Saudi Arabia.
Practical Delivery Focus on usable, supportable solutions rather than unnecessary complexity.	Long-Term Support Continuous improvement after implementation and go-live.

Technology Scope

نطاق الحلول التقنية

Microsoft Dynamics 365 Finance & Operations and Business Central.	Retail & POS Store applications, commerce and operational workflows.
APIs & Integration REST, OData, connectors and system-to-system integration.	Data & Migration Data preparation, validation, migration and synchronization.
Mobile & Web Responsive portals, Android/iOS apps and e-commerce.	Security Roles, duties, privileges and controlled access.
Analytics Operational reporting and business visibility.	Compliance Integration Electronic receipt/invoice and related transaction flows.

Our goal is to make technology serve the business process - with clear ownership, reliable integrations and a user experience that supports daily operations.

LET'S BUILD THE NEXT RETAIL EXPERIENCE
